

TECHNICAL INFORMATION

WESTCO TMTM

(TETRAMETHYLTHIURAM MONOSULFIDE)

Westco TMTM is used as a secondary accelerator with sulfenamides, thiazoles and guanidines; good processing safety compared with other thiurams.

Specifications

Appearance	Yellow to light yellow powder or pellets	
	Powder	Pellets
*Melting point, °C	103 min	103 min
*Moisture, %	0.5 max	0.5 max
*Ash content, %	0.3 max	0.3 max
*Residue on 150 mesh sieve	0.5 max	NA
*Oil content, %	1-2	NA
Specific gravity, typical	1.39	1.39
*Grain strength	NA	2-4

*Actual data will be reported on Certificate of Analysis
