

TECHNICAL INFORMATION

WESTCO CBS Soft Granule

(n-cyclohexyl -2- benzothiazole sulfenamide)

Westco CBS is a delayed action accelerator suitable for natural rubber and synthetic rubber; produces vulcanizates with high modulus and high tensile strength.

Specifications

| | |
|----------------------------------|----------------------------|
| Appearance | Grey white to light yellow |
| Form | Soft Granule |
| Initial Melt Point, °C. | *98 min |
| Final Melt Point, °C. | *99 min |
| Moisture, % | *.5 max |
| Ash content, % | *.5 max |
| Sulfenamide, % | *96 min |
| Free amines (Cyclohexylamine), % | *0.5 max |
| Grain strength | *2 max |
| Alcohol Insolubles, % | 0.5 max |
| Specific Gravity, typical | 1.29 |

* Actual data will be reported on Certificate of Analysis
