

**WESTCO™ HMMM-65% DLD-C Resin
(65% Hexa (methoxymethyl) melamine on a precipitated silica
carrier)
CAS# 3089-11-0**

Technical Data:

WESTCO™ HMMM-65% DLD is a hexa (methoxymethyl) melamine resin on a precipitated silica carrier. It is used as a crosslinking agent with resorcinol or a novolak resin and as an adhesion promoter in rubber compounds with a variety of substrates. It is recommended as a replacement for hexamethylene-tetramine due to lower toxicity and less effect on scorch times.

Specification

Color	White
Form	Free Flowing Powder
*Moisture	4.5% Max.
*Ash	31 – 35%
*Active Content	65–71 Min.

***Values reported on Certificate of Analysis**

Packaging

25 kg paper bags with a plastic inner liner

Storage & Shelf Life:

**Store in original packaging away from direct light and moisture at
40F – 90F**

Shelf life: 24 months from date of manufacture.
