

WESTCO™ TMTM

(TETRAMETHYLTHIURAM MONOSULFIDE)
CAS# 97-74-5

CHARACTERISTICS:

WESTCO™ TMTM is used as a secondary accelerator with sulfenamides, thiazoles and guanidines; and provides improved processing safety when compared to other thiurams.

Specifications:

Appearance Yellow to light yellow oil-treated powder or pellets

	Oiled Powder	Pellets
*Melting point	103°C Min.	103°C Min.
*Moisture	0.3% Max.	0.3% Max.
*Ash content	0.3% Max.	0.3% Max.
*Residue on 100 mesh sieve	0.1 Max.	NA
*Oil content	1-2	NA
Specific gravity, typical	1.39	1.39
*Grain strength	NA	3 Max.

*Actual data will be reported on Certificate of Analysis

Packaging: 25 Kg Net Bags
