

WESTCO™ ZBPD-75 Accelerator
75% active Zinc –O-,O-di-N-butylphosporodithioate
CAS# 6990-43-8

Technical Data:

WESTCO™ ZBPD-75 is a non-staining, non-blooming, fast curing secondary accelerator for rubber compounds, especially EPDM and NR. It may be used with standard rubber accelerators but is most commonly used with other non-nitrosamine generating accelerators. When used in NR, it improves reversion resistance.

<u>Property</u>	<u>Specification</u>
Appearance	White free flowing powder
*Sulfur Content	15.5 – 17.5%
*Assay	73.5 – 76.5%
*SiO₂	23.5 – 26.5%

***Actual data will be reported on Certificate of Analysis**

Packaging: 25 kg bag
