

## WESTCO™ BPH-50

# 2,5 dimethyl-2,5 di(t-butylperoxy)hexaner in an ethylene propylene copolymer binder CAS # 78-63-7

#### **Characteristics:**

Westco™ BPH-50 is a 50% polymer-bound dispersion of DBPH which is used for cross-linking of EPDM, Natural and other synthetic rubber formulations.

### **Specifications**

Appearance: White /Off-White slabs or 5mm cubes

\*Active oxygen, Weight % 4.96 - 5.62%

Specific gravity, g/cc 0.95 – 1.05

\*Assay, % Calculated 45 – 51%

\*Values reported on COA

Packaging: Standard packaging is 50 lb. box

Storage: Store in a cool, dry area in a sealed container below 100° F Handling: Skin contact should be minimized. Wash hands after use.

#### **Revised 1/8/16**
