

WESTCO™ MZ

ZDMC

Zinc Dimethyldithiocarbamate

Westco™ MZ is an ultra accelerator for NR and SR rubber, especially EPDM and latexes, and is active over a wide temperature range. In EPDM it should be used at a more than 1.00 phr to prevent blooming.

***Appearance**

White to yellowish white powder

Specifications	<u>Powder Oil</u>	<u>Powder</u>
	Limits	Limits
*Initial melting point, C min.	240.0	240.0
*Moisture Content, % max.	0.3	0.3
*Sieve Residue on 100 mesh. % max.	0.5	0.5
*Zinc Content, %	19.0 – 23.0	19.0 – 23.0
*Oil Content, %	1.0 – 2.0	N/A
Specific Gravity at 20°C, typical	1.68	1.68

*Actual data will be reported on Certificate of Analysis

Packaging

25 kg paper bags, 500kg skid

Revised 2/2015
