

WESTCO™ DCP 40C Crosslinking Agent **CAS# (Peroxide): 80-43-3**

Technical Data:

WESTCO™ DCP 40C is a 40% dicumyl peroxide on calcium carbonate and is a crosslinking agent for synthetic rubbers and polyolefins. It provides lower compression set and better heat resistance than sulfur cured compounds.

Specifications

Appearance	Light to off-white powder
-------------------	----------------------------------

*Activity:	39 – 41%
-------------------	-----------------

*Calcium carbonate content:	59 – 61%
------------------------------------	-----------------

*Active oxygen:	2.32% Min.
------------------------	-------------------

Specific gravity:	1.55
--------------------------	-------------

Packaging: 20 kg box

***Reported on certificate of analysis**
