

WESTCO™ AO-626 Antioxidant
Bis (2,4'-di-tert-butylphenyl)pentaerythritol Diphosphite
CAS# 26741-53-7

Technical Data:

WESTCO™ AO-626 is a highly effective antioxidant giving excellent protection to melt flow and color during thermal processing. It can be used in a variety of polymers, including polyolefins, polycarbonates, polyesters and styrenics. It is often used with hindered phenols, like AO-1010 or AO-1076 for synergistic performance. It may also be used with UV absorbers or hindered light stabilizers for optimal performance.

Specifications

Appearance	White powder
*Purity	95% Min.
*Melting Point	160 – 180°C
Volatiles	1.0% Max.
*Acid Number	1.0 mg KOH/g Max.
1,1',1''- Nirilotris-2-propanol	1.0% Max.

***Actual data will be reported on Certificate of Analysis**

Packaging – 25 kg cardboard box or drum
